Subject: Ethical Statement for the Use of Dental Radiograph Images in Research

## TO WHOM IT MAY CONCERN

I, Dr. Nawasad Bakkar at Dental Touch, am writing to express my support for the research project led by Md. Fahim Shahoriar Jim, Ms. Afifa Zain Apurba, and their supervisors are Mr. Saif Ahmed & Mr. Shafin Rahman on the detection research with dental radiograph images.

As a medical professional, I ensure that the dental radiograph images provided for this research have been collected with full ethical consideration. This includes obtaining informed consent from all patients, ensuring their anonymity by removing personal identifiers, and complying with all relevant data protection laws and regulations. The collection and use of these images have been approved by the Institutional Review Board (IRB) of our institution, confirming adherence to ethical research standards.

The researchers have committed to using the images solely for the purpose of their study and to properly credit the source in any related publications or presentations. I affirm that this process respects patient rights and aligns with the ethical pursuit of medical knowledge advancement.

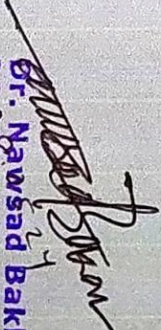

For any further inquiries or additional documentation, please contact me at the provided details.

Sincerely,

Dr. Nawasad Bakkar

**Subject: Certification of Dataset Classification for Research**

## Acknowledgment Certificate

This is to certify that the dataset used in the research conducted by Ms. Afifa Zain Apurba and Mr. Fahim Shahoriar Titu has been properly classified under my guidance.

As the supervising dentist, I confirm that the dataset adheres to the required standards and has been organized appropriately to support their research work.
